

## ***PRODUCT SPECIFICATIONS***

**Order Detail:** Human synovial tissue was harvested from a post-mortem donor with no clinical history of joint disease or arthritis. Synovial tissue cells were isolated from tissues using enzymatic digestion and then cultured to remove non-adherent cells. The synovial fibroblasts were then processed for cryopreservation.

**Physical State:** Frozen

**AE Product Number:** CDD-H-2910-N, Human cryopreserved synoviocytes, normal donor

**Country of origin:** USA

**Donor ID Number:** ST-1509

**Donor Information:**

Donor ID	Medical History	Cause of Death	Age	Race	Sex	Media
ST-1509	Normal	Lung cancer	53	Caucasian	female	90% FBS/10% DMSO

**Quality Control:** Tested for bacteria, fungi, mold and yeast.

**Serology Testing:** Tested negative for HIV 1 and 2, Hepatitis C Ab, Hepatitis BsAg.

**Note:** For in vitro research use only, not for diagnostic or therapeutic use. This product is not a medical device.
