

Reagent for PFAS Analysis

Perfluorooctane sulfonic acid (PFOS) and perfluorooctanoic acid (PFOA), which are polyfluoroalkyl substances (PFAS), are difficult to decompose in the environment and have a high accumulation potential. They are subject to various international regulations, including the Stockholm Convention on Persistent Organic Pollutants (POPs). Fujifilm Wako provides pretreatment columns, solvents, analytical standards, and mixture standard solutions that can be used to analyze PFAS

Mixture Standard Solution

✓ **Mixture standard solutions with clear concentration value of linear PFAS!**
